Company Overview

Skem@ S.r.l. is an Industrial Solutions Provider that offers innovative solutions and tailor-made services and products that improve the quality, the safety, the environmental, and deliver added value to its Clients.

Skem@ is a leading Italy-based company operating in domestic and international markets. Our business activities serve many sectors of the industry, but in particular the polyolefins sector.

We can provide all or part of the services for basic and detail engineering, procurement, construction supervision and project management. We also offer turnkey solutions for the design, manufacture, testing and maintenance of skid-mounted systems, control, safety and instrumentation systems, electrical power systems and data communication systems.

Our Customers include major Oil and Gas, Petrochemical and Power Companies, EPC Contractors and leading Manufacturers of equipment in the said markets.

We continuously improve our service capability and scope of offering to assure the satisfaction of our Customers.

HSEQ

At Skem@, we promote the culture of quality by implementing a management system that meets business goals. It is based on a process model and a continuous improvement cycle in all four stages of planning, implementation, checking and review.

Skem@ is committed to sustainable development, protecting the environment, safeguarding the physical wellbeing of our employees and ensuring our installations and equipment operate.

Skem@ is certified ISO 9001 and OSHAS 18001.

Business Area

The Company operates, mainly, in the following business areas:

- **Petrochemical**
- **Oil & Gas**
- **Power**

Services and product portfolio

Services and Products portfolio include the following four areas:

Project Management

Skem@ has significant experience with several project management endeavors throughout the world. Our Integrated Project Team approach with our Clients ensures the maximum efficiency and successful of projects regardless of the size and scope. Skem@ Project Management solutions offer highly experienced, skilled employees to drive business performance and results.

We provide:

- Project Estimating
- Planning and Scheduling
- Construction Management and Supervision
- Project Controls
- Quality Assurance
- HSE

Engineering

The division delivers an array of engineering projects from re-vamp of existing facilities to grassroots initiatives across the globe.

After the conception design phase and feasibility studies, a project enters into the engineer phase which may include, according to the type of project, the following steps:

- Basic engineering design (BED)
- Front end engineering design (FEED)
- Detail engineering (DE)

Systems Integration and Packages

The Division of System Integration is specialized in providing turnkey solutions for the design, manufacture, testing and maintenance of skid-mounted systems, control, safety and instrumentation systems, electrical power systems and data communication systems. Our offer is never off the shelf, but perfectly tailored to the Customer needs. Specific Industrial Services include:

- Industrial automation
- Package units

R&D + Innovation

In support of Skem@'s core activities, the R&D contributes to optimize design and execution of projects through the selection of the proper process technologies and related know-how, as well as the application of the most advanced third-party state-of-the-art technologies, focusing on the company's business areas. The research and development activities are carried out with strategic partnerships with both Universities and Research Centers. Skem@'s program of research and technological development on renewables started back in 2012 with the focus on the conversion of wind energy. Skem@ owns patents in small-scale wind turbines and for Unmanned Aerial Vehicles (UAV) family.
